# International Introduction to Investment

## What is the International Introduction to Investment?

This qualification provides a comprehensive introduction to the financial services industry with a specific focus on investments from a global perspective. It is the first step in the CISI's qualification pathway, and it is taken by many practitioners as it is the foundation exam for higher level CISI qualifications.

The qualification covers key financial principles and products including assets and markets, equities, bonds, derivatives, investment funds, retirement planning, loans, mortgages and life assurance.

It explores the broader economic environment in which the financial services industry operates and looks at how economic activity is determined and managed in different economic and political systems. This qualification offers a first introduction to financial services regulation focusing on financial crime, insider trading and market abuse, and provides candidates with an understanding of ethical behaviour and acting with integrity.

## Who should study the International Introduction to Investment?

It is intended for new entrants and staff who are beginning their career in the financial services industry. The broad topics covered make the qualification suitable for all staff, not just those responsible for making investment decisions, including administration, finance and accounting, IT, customer service, sales and marketing and HR and training.

## Key features

- **A comprehensive entry-level qualification** – provides a detailed overview of investment and industry terminology from a global perspective
- **First step in the CISI's qualification pathway** – can be taken as a stand-alone qualification or as part of the Investment Operations Certificate (IOC)
